

RESOLUTION NO. 630

PROVIDING FOR PRIOR REVIEW OF ROAD WORK

WHEREAS, the Yavapai County Board of Supervisors recognizes the need for review of the engineering for work on County roads prior to the beginning of the work;

NOW THEREFORE, BE IT RESOLVED that all road work planned except routine maintenance (grading, patching, etc.) will be reviewed by the County Engineer's office prior to beginning the work to insure that adequate engineering has been done and each project has been reviewed. This review will assure that:

- (1) Work is being done on county accepted road, with dedicated right-of-way or on an established county road;
- (2) The county has the legal right to do the work;
- (3) The project is budgeted for;
- (4) Sufficient funds are on hand to do the project.

The County Engineer's office will determine the amount of inspection necessary for each project and will see that it is done.

PASSED AND ADOPTED BY THE YAVAPAI COUNTY BOARD OF SUPERVISORS this 17th day of December, 1984.

ATTEST:

Aileen Lawrence
Clerk, Yavapai County Board of
Supervisors

John Olson
Chairman, Yavapai County Board of
Supervisors
