COVID-19 Information

The Arizona Department of Health has up-to-date monitoring of testing and results, information about the virus and prevention/preparation. The link is: <https://azdhs.gov/preparedness/epidemiology-disease-control/infectious-disease-epidemiology/index.php#novel-coronavirus-home>

The state's focus is to monitor travelers, identify and isolate potential carriers, contact tracing for anyone in contact with those individuals, and testing high suspect cases. Health departments throughout the state are conducting disease surveillance, coordinating with health partners, developing and distributing guidance to schools, law enforcement, cities and towns, implementing preparedness plans and communicating with state, the CDC and the public. The shift nationally now is to slow the spread of the virus, promote social distancing and protect health care providers.

On Monday, Governor Doug Ducey and ADHS Director Dr. Cara Christ discussed the latest info on the COVID-19 virus and what precautions Arizonans can take to stay healthy. The link to the video of that press conference is <https://youtu.be/SRDMWqfOgi4>.

There are webinars throughout this week, they will be recorded and posted on the website if you miss the date/time. Here is the link to the login info:
