Yavapai Regional Medical Center reports **1** hospitalization with COVID-19 and **1** person under investigation (PUI). Verde Valley Medical Center reports no hospitalizations with COVID and **22** PUIs. The VA has reported no hospitalizations or PUIs for COVID-19.

COVID-19 Summer - According to the Global Heat Health Network, this year is on track to be one of the hottest on record, and public health officials worry that in cities across the US, summer heatwaves will collide with the coronavirus pandemic, with deadly consequences for poor, minority and older populations.

Common public health actions to reduce heat-related illness and death may need to be modified in locations where they are restricted, unavailable or in contradiction to public health measures to limit the transmission of COVID-19. These measures include: "leave hot apartments for public spaces"; "go to public air-conditioned locations such as cooling centers, shopping malls, and libraries"; "regularly check on vulnerable persons"; "use fans to cool rooms without air-conditioning"; and "seek urgent medical care if showing signs of heat stroke". Furthermore, hot weather conditions may complicate COVID-19 responses by increasing patient loads and creating occupational health risks for health workers and responders.

High temperatures kill hundreds of people every year. Heat-related deaths and illness are preventable, yet more than 600 people die from extreme heat every year. Take measures to stay cool, remain hydrated, and keep informed. Getting too hot can make you sick. You can become ill from the heat if your body can't compensate for it and properly cool you off.

Food Sharing Events this week:

- **Chino Valley every Tuesday 5:00-7:00 p.m.** - Saint Catherine Laboure Catholic Church, 2062 AZ-89
