Arizona has made national news this week for its level of COVID-19 illness. The state's total number of COVID-19 cases has increased by 76% since May 28. The percent of positive cases out of total COVID-19 tests has been increasing in recent weeks, too, which is the opposite direction of where the state wants to be headed.

Yavapai County's positive rate may be the lowest in the state, but we have seen additional cases each day this week. YCCHS asks all Yavapai County residents to comply to protect yourself, your families, friends and neighbors from COVID-19, by physically distancing, wearing a mask when being physically distancing isn't possible – and in public places. Practice good hygiene: Wash your hands, especially after touching any frequently used item or surface. Avoid touching your face. Sneeze or cough into a tissue, or the inside of your elbow. Disinfect frequently used items and surfaces as much as possible including your phone.
