Gila	+15	La Paz	+10	Maricopa	+2,143	Mohave	+40	Navajo	+63
Pima	+228	Pinal	+134	Santa Cruz	+49	Yavapai	+39	Yuma	+198

What happens if an employee is suspected or confirmed to have COVID-19?
To ensure continuity of operations of essential functions, CDC advises that critical infrastructure workers may be permitted to continue work following potential exposure to COVID-19, provided they remain asymptomatic and additional precautions are implemented to protect them and the community.

- **Pre-Screen:** Employers should measure the employee's temperature and assess symptoms prior to them starting work. Ideally, temperature checks should happen before the individual enters the facility.
- **Regular Monitoring:** If the employee doesn't have a temperature or symptoms, they should self-monitor under the supervision of their employer's occupational health program.
- **Wear a Mask:** The employee should always wear a face mask while in the workplace for 14 days after last exposure. Employers can issue facemasks or can approve employees' supplied cloth face coverings in the event of shortages.
- **Social Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Disinfect and Clean work spaces:** Clean and disinfect all areas such as offices, bathrooms, common areas, shared electronic equipment routinely.

If the employee becomes sick during the day, they should be sent home immediately. Surfaces in their workspace should be cleaned and disinfected. Information on persons who had contact with the ill employee during the time the employee had symptoms and 2 days prior to symptoms should be compiled. Others at the facility with close contact within 6 feet of the employee during this time would be considered exposed.

Should workers notify their employers if they've been exposed to COVID-19?

Workers who have been potentially exposed to COVID-19 at work, home, or elsewhere should notify their employers. A potential exposure means being a household contact or having close contact within 6 feet of an individual with confirmed or suspected COVID-19. The timeframe for having contact with an individual includes the period of 48 hours before the individual became symptomatic.
