Nine States Reach 70% of Residents with a Least One Dose of COVID-19 Vaccine

Currently, Arizona has vaccinated 45.3% of the population with one dose of COVID-19 vaccine with Yavapai County at 41.5%. Twenty-five states and Washington, DC have reached at least 50% of their populations vaccinated against COVID-19. This news builds on experts' optimism about the country's declining COVID-19 case numbers and where things could stand by summertime as vaccine numbers continue to climb. Earlier this month, President Joe Biden set a goal of administering at least one Covid-19 vaccine dose to 70% of American adults by July 4 -- and has said Americans will be able to celebrate Independence Day by then with a true semblance of normalcy. So far, more than 61% of US adults have gotten at least one Covid-19 shot and more than 49% are fully vaccinated, according to CDC data.

Other good news is that people can receive the vaccine at their doctor's office. Yavapai Regional Medical Center lists all the primary care groups offering the vaccine, and Spectrum is offering appointments through their clinics -- with a drive-up option. Yavapai County Community Health Services and the Community Health Center of Yavapai also offer office visits to get vaccinated against COVID-19. Spectrum Healthcare (877-634-7333), YCCHS clinics (928-771-3122), and Community Health Center of Yavapai (928-583-1000).

The Yavapai County Phone Bank is still available for those needing assistance in making appointments -- 928-442-5301.

Yavapai County reports 37 COVID-19 Cases since Friday for an average of **12** cases per day. The county has tested **117,800** residents for COVID-19 with **19,162** positive cases and **507** deaths since the beginning of the pandemic. Yavapai Regional Medical Center reports **12** COVID-19 patients, VVMC reports **6**, and the VA has **1** COVID-19 patient.
