November 24th Update - Yavapai County reports 105 COVID-19 Cases

Apache	5,036	Coconino	7,114	Cochise	3,272	Graham	2,008	Greenlee	187
Gila	2,689	La Paz	755	Maricopa	194,410	Mohave	5,808	Navajo	7,756
Pima	36,986	Pinal	15,613	Santa Cruz	3,664	Yavapai	4,746	Yuma	16,932

15,556 Arizonans have been tested for COVID-19 since yesterday, with 4,544 positive results and 51 deaths reported statewide. Yavapai County has cumulatively tested 60,598 residents with 4,746 positive cases, 1,816 recovered, and 107 deaths. YRMC West has 21 COVID-19 patients and YRMC East is caring for 8, with 1 person under investigation (PUI). The Verde Valley Medical Center reports 21 COVID-19 hospitalizations and 1 PUI. The VA reports 3 COVID-19 patients.

New COVID-19 Cases since Yesterday									
Apache	+115	Coconino	+126	Cochise	+135	Graham	+75	Greenlee	+6
Gila	+58	La Paz	+5	Maricopa	+2,907	Mohave	+165	Navajo	+102
Pima	+327	Pinal	+268	Santa Cruz	+40	Yavapai	+105	Yuma	+106

Where are all these cases coming from? Our contract tracers are fielding hundreds of cases each day. They are seeing spread from large congregate indoor settings like private events, church services, long-term care facilities, establishments not following the recommended mitigation measures – like big box stores. Small social gatherings and parties have also been incubators for the virus. COVID-19 is most contagious in the first 5 days after symptoms onset, which underscores the importance of early case identification and quarantine.

Know How it Spreads:

- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).
- COVID-19 is primarily spreading person-to-person through respiratory droplets produced when an infected person coughs or sneezes. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
- Minimize contact with others to avoid being exposed to this virus. Not everyone who has COVID-19 shows symptoms.

How You Can Protect Others

- If you are sick, limit contact with others as much as possible to keep from infecting them.
- If you are sick and around other people (ie. sharing a room or a vehicle, before entering a healthcare provider's office), you should wear a face mask. If you are not able to wear a face mask, then you should do your best to cover your coughs and sneezes.
- If you have concerns or questions about your health or potential exposure to the coronavirus, you should contact your healthcare provider.
